FIRE TANKER VEHICLE

ADDENDUM #3 – JULY 31, 2024

4.1 – Schedule A – Detailed Vehicle Specifications – Exhaust System pg 13 of 18

1. All apparatus must have their existing exhaust systems modified so that the exhaust pipes are horizontal to the ground, a minimum of 12 inches forward of the tires, 3 inches below the trim of the truck and the exhaust pipe must come out flush with the trim of the truck.
 - a. Please supply the diameter of the exhaust pipe this will ensure that we are aware of an upgrade required to the existing exhaust grabber assembly.

Note: The existing exhaust pipe size on our tanker is 5 inches.
