

TOWN OF LUNENBURG

TOL2026005

ADDENDUM #2

1. Would it be possible to receive photos or a detailed description of the existing bases, posts, and bracketry, in order to better understand how the panels will be installed?

A: Please see photos attached. The majority of panels are attached to a two-post base that combined acts as a large backing bracket. It appears the bolts are fixed to the panel . There are a couple of single post bases, which are fixed through the back of the panel with screws.

2. As a company located outside the Province of Nova Scotia, are we required to submit a paper copy by mail in addition to an email submission, or can the proposal be submitted electronically only by email to the contact person listed in the RFP?

A: Electronic only is okay.

3. Once the RFP is awarded, will the final vector files (PDF/vector format) be provided to replace the visual mockups currently included in the RFQ?

A: All existing files will be provided once the RFP is awarded.
